

How to Bronze - VIEVE Modern Bronzer Light

Step 1: Sweep Where the Sun Hits

Use the 127 Powder & Bronze Brush to apply the lighter shade over the forehead, cheekbones and jawline.

This adds radiant warmth and a natural sun-kissed glow.

Step 2: Add Dimension & Definition

Using the 121 Blush & Bronzer Brush, dip into the darker shade and apply it under the cheekbones, up to the temples, and down the sides of your nose to sculpt and define.

Step 3: Blend for a Seamless Finish

Blend both shades gently using circular motions for a soft, second-skin finish. Adjust intensity by building layers.

Step 4: Refill with Ease

Once finished, use a pin to push through the hole on the back of your compact to release the pan and insert a magnetic refill.

Pro Tips

- Use a small amount to start and build as needed.
- Pair with VIEVE Modern Radiance Cream Bronzer for extra depth.
- Perfect for fair to medium skin tones.
- Great for bare skin or over foundation.
